Up To Date

Dear Agricultural and Technology Academy,

Addressed Directly to the School

Thank you for your interest in our after-school program for students.

We, at Let's Farm, are excited with the opportunity to become business partners with your school, Agricultural and Technology Academy (ATA). After our recent conversation with your school leader to discuss potential programs and partnerships, we strongly support ATA's mission to foster an interest and increase aptitude in areas of engineering and technological advances in agriculture for children in grades K-6.

Clear desire for partnership and support for the School

We believe that providing ATA with an after-school program would further ATA's mission. We would like to offer ATA two (2) forty-five (45) minute after school programs a month, for one year, at a discounted price. The original price of our program is \$85 per student per year, but because of our support of ATA's mission, Let's Farm wants to offer ATA a special price of \$45 per student per year. Let's Farm wants to help ATA's students achieve inside the classroom and out, and we believe that our after-school program would help fortify and expand their knowledge.

During the forty-five minute after school program, Let's Farm will provide all materials for children to construct motorized models with building blocks, provide each child with a laptop computer to program a cartoon character and software to design an efficient farming operation. We teach a short lesson at the beginning of class and reinforce the concept at the end of class, after it has been applied in the activity.

Let's Farm is designed to work directly with schools on-campus, utilizing only an open room to hold the weekly meeting. Let's Farm provides all materials to learn, as well as end-of-session incentives for the children to work for higher achievements. Our hope is that the future students of ATA will be exposed to a learning environment that enriches their desire to grow in technology and design.

Specificity about the program length, the price of the program, and where the program will occur.

We understand that you are in the process of being approved, and are willing to hold this offer open until you are ready to move forward.

Sincerely,

Director of Let's Farm
